

Ignite® SN Herbicide label expanded via Minor Use Program for control of labeled weeds on strawberries in Canada

J. Chaput, OMAFRA, Minor Use Coordinator, Guelph

The Pest Management Regulatory Agency (PMRA) recently announced the approval of a minor use label expansion registration for **Ignite® SN Herbicide** for control of labeled weeds on strawberries in eastern Canada and British Columbia. **Ignite® SN Herbicide** was already labeled for use on a number of crops in Canada for control of several weeds.

This minor use project was submitted by Agriculture & Agri-Food Canada (AAFC-PMC) as a result of minor use priorities established by growers and extension personnel.

The following is provided as an abbreviated, general outline only. Users should be making weed management decisions within a robust integrated weed management program and should consult the complete label before using **Ignite® SN Herbicide**.

Crop(s)	Target	Rate (L/ha)	Application Information	PHI (days)
Strawberries (day neutral, June-bearing) [EASTERN Canada & BC only]	Labeled weeds	2.7 – 5.0	Application may be made to strawberries in the fall, spring or in-season. Ignite SN Herbicide may be applied as a banded application to row middles only, using a hooded or shielded sprayer. Avoid contact of Ignite SN Herbicide solution, spray, drift or mist with strawberry plants as serious crop injury may result. Repeat treatments may be necessary to control new germination of annual weeds. Do not make more than 2 applications per year.	1

Ignite® SN Herbicide is toxic to aquatic organisms and non-target terrestrial plants. Do not apply this product or allow drift to other crops or non-target areas. Do not contaminate off-target areas or aquatic habitats when spraying or when cleaning and rinsing spray equipment or containers.

Follow all other precautions, restrictions and directions for use on the Ignite® SN Herbicide label carefully.

For a copy of the new minor use label contact your local crop specialist, regional supply outlet or visit the PMRA label site <https://www.canada.ca/en/health-canada/services/consumer-product-safety/pesticides-pest-management/registrants-applicants/tools/pesticide-label-search.html>
